

# PowerPlan Connect

SOLUTION BRIEF

Unlock the full power of your PowerPlan data with our growing suite of data integration, data extraction and process automation tools

As a PowerPlan client, you need integration solutions that work seamlessly with your ERP platform, integration middleware and BI tools, and won't break every time something in your ecosystem is updated. You also need tools that support your broader data strategy, minimize integration risk and help your teams automate manual processes. Wherever you are in your journey to the cloud, our Connect solutions give companies the control and automation you need to combine data across platforms and gain true insight into your business.

Tool	Business value	Integrated ecosystem
 <b>Adapters</b> Perform multiple functions to continually exchange transactions with another system	Works bidirectionally to add rich PowerPlan transaction detail to your other core reporting systems to help you reduce tax liability, optimize income recovery and more	Connects with your ERP (enterprise resource planning) system or WMS (work management system)   <b>ERP</b> <ul style="list-style-type: none"><li>• SAP ECC</li><li>• SAP S/4 HANA</li></ul> <b>WMS</b> <ul style="list-style-type: none"><li>• Maximo</li></ul>
 <b>Web Service APIs</b> Work with your on-premise or PowerPlan cloud deployment	 <b>Integration Hub</b> Collection of the most common, single-purpose functions for the purpose of exchanging transaction data across systems on demand or on a predefined schedule	System agnostic to let you easily connect PowerPlan with your other enterprise applications
 <b>Data Hub</b>	<ul style="list-style-type: none"><li>• Gives business users and IT teams secure outbound access to your PowerPlan data on a predefined schedule of your choice</li><li>• Extracts PowerPlan data as an intuitive, easy-to-consume data library for a broad set of users outside of the PowerPlan user base</li></ul>	Easily distribute data to your data warehouse, BI (business intelligence) tools, spreadsheet applications or other data processing applications
 <b>Workflow Process Automation (WPA)</b> Dynamic workflow designer and automation engine standardizes your manual PowerPlan processes	<ul style="list-style-type: none"><li>• Automates tasks like accounting month end, data integration workflows, and report or query distribution with parallel processing for maximum speed and efficiency</li><li>• Operates on demand or on a predefined schedule of your choice</li></ul>	Pairs with your on-premise or hosted PowerPlan instance
