## Gas Repairs Solution Matrix

| Unit of Work by Property Type | Tax Unit of Property | Location | Aggregation Rules | Safe Harbor Method | Nuances |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Distribution Linear Specific | Major Component: Mains Minor Component: Services Includes: Fittings, Valves, Tunnels, Casing, Cathodic Protection, Instrumentation \& Controls, Connectors | Zip Code <br> (if aggregation eligible) | $\cdots$ Yes | 4-mile Threshold | - Aggregation determines location specificity <br> - Subject to $5 \%$ increase capacity test, with certain "outs" if related to safety <br> - Additional calculation defined for unidentified service property |
| Distribution Linear Blanket | Major Component: Mains Minor Component: Services Includes: Fittings, Valves, Tunnels, Casing, Cathodic Protection, Instrumentation \& Controls, Connectors | Not Applicable | ( $\mathrm{*} / \mathrm{A}$ | 50k De-minimis Rule "Reasonable" Allocation Method | - If Zip Code is available by "event" and don't have a 50k policy, blankets must behave like a specific project under the WMIS method |
| Transmission Linear Specific | Major Component: Transmission Pipe Includes: Fittings, Valves, Tunnels, Casing, Cathodic Protection, Instrumentation \& Controls, Connectors | Hydraulic Subsystem | $\cdots$ Yes | 10\% by Hydraulic Subzone | - Subject to 5\% increase capacity test, with certain "outs" if related to safety |
| Transmission Linear Blanket | Major Component: Transmission Pipe Includes: Fittings, Valves, Tunnels, Casing, Cathodic Protection, Instrumentation \& Controls, Connectors | Not <br> Applicable | ( $N / A$ | 50k De-minimis Rule "Reasonable" Allocation Method | - If Hydraulic Subzone is available by "event" and don't have a 50k policy, blankets must be handled like a specific project under the WMIS method |
| Non-Linear T\&D | Many (Examples: Compressor Station equipment and Storage Facility equipment like tanks, wells, scrubbers, etc.) | Station/ Storage Facility | No | Open to Interpretation | - UOP definitions <br> - Notable exclusions for things like smart pipeline inspection gauges and cleaning pipeline inspection gauges |
