

# Data Hub

SOLUTION BRIEF

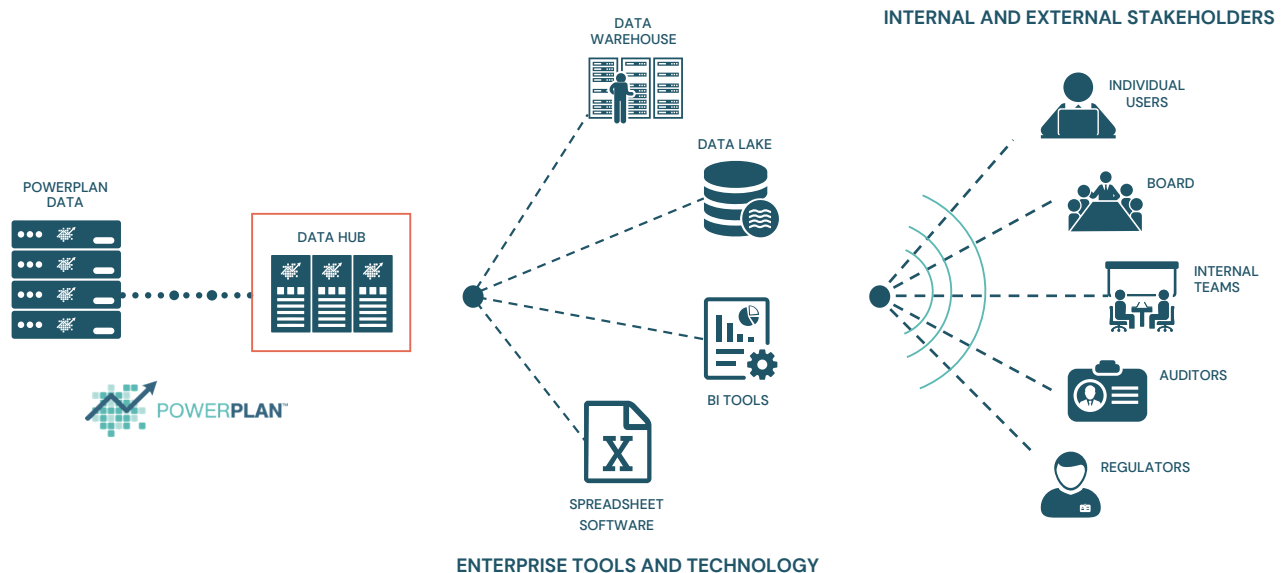

Unlock the full power of your PowerPlan data with our plug-and-play APIs

IT teams large and small are being asked to centralize data, integrate it seamlessly with other cloud systems and get it into the hands of stakeholders — all while maintaining data integrity. We've done the hard work of transforming your PowerPlan data for you, organizing it in a way that's highly consumable by your systems and users and helps your business make more informed strategic decisions.

## Connects data to technology and people to insight

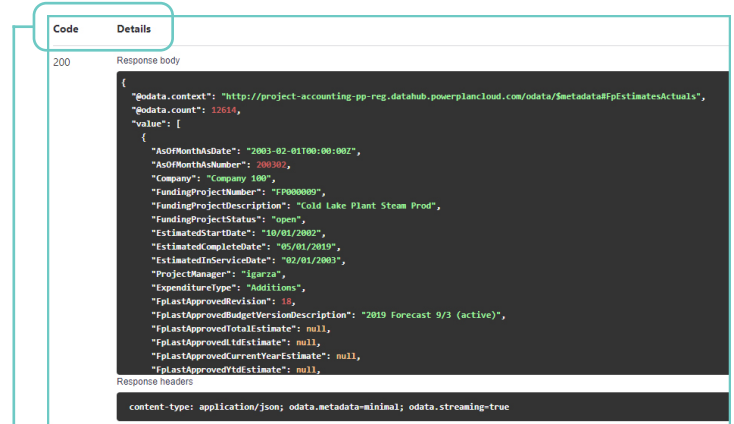

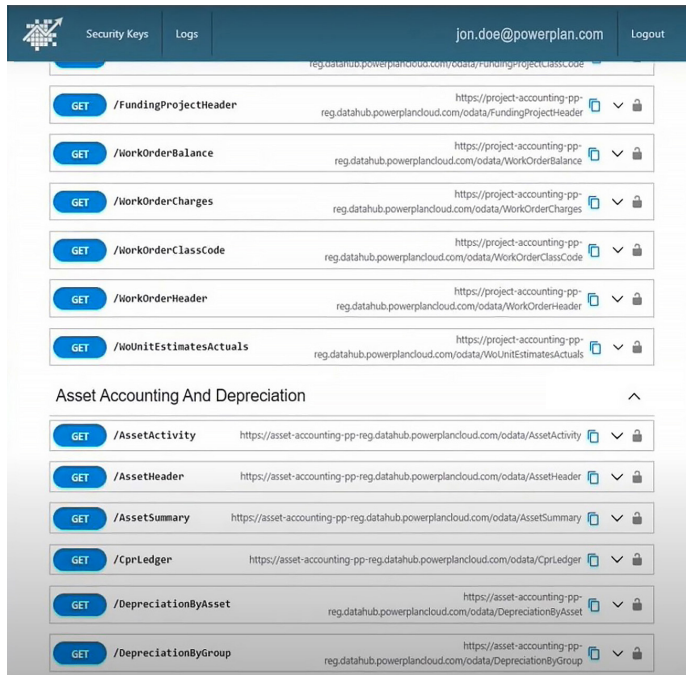

As part of our Connect family of integration solutions, Data Hub makes it easy to get your data out of PowerPlan to your data repository, BI tools or spreadsheet software and into the hands of your internal and external stakeholders.

## Data Hub's advanced technology makes it easy to turn raw data into true insight, wherever you are on your cloud journey

- ✓ Web service REST APIs are compatible with both on-premise and cloud PowerPlan solutions
- ✓ Includes a comprehensive library of your PowerPlan asset and project accounting data
- ✓ SaaS delivery means easy deployment and regular updates without disruption to your business
- ✓ Functions independently from the transactional system
- ✓ Odata (open data protocol) format makes PowerPlan data easily discoverable by common tools
- ✓ Requires no SQL knowledge in order to query data effectively
- ✓ Eliminates the burden and cost of manual data pulls and custom extractions
- ✓ Improves data transparency with an intuitive data layer for easy consumption

We've organized and transformed the data for you in clean, intuitive endpoints, simplifying the initial configuration and giving you full confidence in the data you're requesting and receiving

Interactive API definitions let users easily build API calls, then view live OData results

## Data Hub turns your PowerPlan data into a strategic asset

- ✓ Empowers stakeholders to access the PowerPlan data they need directly
- ✓ Allows you to combine PowerPlan data with other system data in your centralized reporting tools for more holistic financial decision-making and rich views of your business that an ERP system alone can't provide
- ✓ Enables you to respond quickly and confidently to regulatory and audit needs
- ✓ Facilitates system-to-system reconciliation
- ✓ Directly supports rate cases
- ✓ Helps you conduct more effective Project/Work Order cost analysis
- ✓ Makes it easier to get an immediate handle on budget vs. actuals
- ✓ Reveals hard-to-detect data anomalies to improve data quality and confidence
